quangtran_tester

Data Engineer · Sydney NSW · quangtran_tester@example.com · 0491 570 156 · github.com/quangtran-tester-demo

Summary

Data engineer with 5 years of experience building batch and streaming pipelines on AWS. Comfortable owning a pipeline from ingestion to the dashboard, and keen on data quality, testing and clear documentation.

Experience

Senior Data Engineer **Mar 2023 – Present**
Wattle Analytics, Sydney

- Rebuilt the nightly ELT on Airflow and dbt, cutting run time from 4 hours to 50 minutes.
- Introduced dbt tests and data contracts; failed loads dropped by 70% in six months.
- Built a Kafka to Snowflake streaming feed for near real-time sales reporting.

Data Engineer **Feb 2021 – Feb 2023**
Bluegum Labs, Sydney

- Wrote PySpark jobs on AWS EMR processing 2 TB of event data per day.
- Managed infrastructure with Terraform and Docker; set up CI for data jobs in GitHub Actions.

BI Analyst **Jan 2020 – Jan 2021**
Southern Cross Data, Melbourne

- Built Power BI dashboards and SQL models for the finance team.

Education

Bachelor of Information Technology (Data Science) **2016 – 2019**
Harbourside University, Sydney

Skills

Python, SQL, dbt, Apache Airflow, Apache Spark, PySpark, Kafka, Snowflake, PostgreSQL, AWS (S3, EMR, Glue, Lambda), Terraform, Docker, Git, GitHub Actions, Power BI, data modelling, data quality testing

Projects

Open transit delays: a public dashboard of Sydney train delays built from the open GTFS feed with Airflow, DuckDB and Streamlit.

Certifications

AWS Certified Data Engineer – Associate (2024) · dbt Analytics Engineering Certification (2023)
